

# THE COATING SHOP

Coating shop service

## CUSTOM COATINGS FOR STUDS, FASTENERS, FLANGES, VALVES AND HOUSINGS – FOR PLANT AND OILFIELD USE

Our coatings make for "easy on", "easy off" jobs with studs, fasteners, flanges, valves and housings

Actual corrosion tests. Left: Xylan bolt - moderate coating and oxidation damage. Nuts not frozen. Center: Cadmium plated bolt - total coating failure. Severely corroded. Right: Plain steel bolt - bolt utterly destroyed. Would fail in service. Photo: Whitford

Corroded steel housing before and after cleaning and coating

## Services:

- Custom coating for maximum protection against: corrosion, abrasion-wear, saltwater, chipping, and weather-wear
- Prepare treat ferrous surfaces for paint, oil and topcoat
- Coatings: xylan (fluorocarbon polymer coating), epoxy coat, aerocote (a phosphorous conversion coating)
- Coatings on low friction or metallic and non-metallic surfaces
- Equipment protection effective for temperature ranges from -217° to 260° C
- Our coatings make for "easy on", "easy off" jobs with studs, fasteners, flanges, valves and housings
